

bio & artist statement

phillm is an award winning artist, photographer, & filmmaker based in the san francisco bay area.

i feel that photography has the power to capture emotion, real or imaginary, within a single frame. i constantly try to achieve this in my own work, encouraging the viewer to elicit an emotional response.

i hand process my film and embraces the imperfections in each photograph, letting the light and chemistry mix in an organic and often surprising way.

after all, perfection is boring.
